MICRO MICROPHONES

## Da-cappo DA12 single ear micro microphone

DA12 is an earset microphone able to suit a wide range of head sizes ensuring comfort and firm fitting for most users.

- 2.5mm diam European designed capsule which has been proven to provide clear full-frequency audio
- enclosure design that protects the capsule so as to be water resistant
- ear-cushion can be adjusted to suit smaller and larger ears
- adjustable boom length to suit preference
- sweat ring on boom for extra moisture protection
- available in two sensitivities and four colours
- package includes lavalier style mic clip to secure cable to collar behind neck

DA12 comes in a zipper leatherette case containing the mic, cable, cable clip, and wind sock. At time of purchase, customer selects one adaptor from the wide range available.

Equivalent noise (A-weighted)	25dB SPL
Output Impedence	2Kohm±30%
SPL max	140dB
Operating Voltage	0.9 VDC (optimal), 5 VDC (maximum)
Cable	1.2mm diameter
Mic Capsule Dimension	2.5mm diameter

Available in Beige, Black, Coffee & White

### 1. Adjusting boom length

DA12 has an adjustable boom. Simply slide the boom to the desired length.

### 2. Adjusting earpiece size

Inside the soft comfort-fit rubber of the ear-cushion is flexible sprung steel which can be adjusted to fit all ear sizes from extra-small to extra-large. You can see in figure 1 and 2 how the ear-cushion is adjusted by simply bending or stretching the earpiece. *Note: You may need to bend the ear-cushion further than expected as it will spring back into it's new size.*
